

# FX10 (Composite)

The FX10 matches the part strength, surface finish, and reliability of our Industrial machines with a next-generation sensor package and flexible modular system design which enables users to upgrade to a metal printing engine. The heated print chamber and automated spool changeover let you print large, high-quality parts, while its laser micrometer and onboard vision module capture detailed composite part images for precise calibration, inspection, and verification.

<b>Composite Printer Properties</b>	<b>Process</b>	Composite Fused Filament Fabrication, Continuous Fiber Reinforcement
	<b>Build Volume</b>	375 x 300 x 300 mm (14.8 x 11.8 x 11.8 in)
	<b>Weight</b>	122 kg (270 lbs)
	<b>Machine Footprint</b>	760 x 640 x 1200 mm (30 x 25 x 46 in)
	<b>Temperature Control</b>	Heated chamber reaches up to 60°C ready-state
	<b>Print System</b>	Direct-drive print head with two nozzles (one plastic, one fiber), automatic material changeover
	<b>Power</b>	100-120 VAC 12A / 15A 200-240 VAC 6A / 8A
	<b>Safety</b>	UL 2011/CSA C22.2#301 certified, CE Marked, EU Machinery Directive compliant
<b>Materials</b>	<b>Plastics</b>	Onyx®, Onyx FR, Onyx ESD
	<b>Continuous Fibers</b>	Carbon Fiber, Carbon Fiber FR
<b>Part Properties</b>	<b>Layer Height</b>	125 µm minimum, 250 µm maximum
<b>Software</b>	<b>Eiger™</b>	Secure digital library, powerful slicer, and printer management (premium options available at cost)
	<b>Inspection</b>	Laser micrometer and vision module scan parts for accuracy
	<b>Security</b>	Two-factor authentication, org admin access, single sign-on, MFP print files encrypted by default and tamper resistant
	<b>Connectivity</b>	Eiger connection and over-the-air updates via wi-fi and Ethernet

\* All specifications are approximate and subject to change without notice. Support for print materials and layer heights will be added over time, though not in every combination. Vision Module will not ship with the first FX10 units but will be included as an upgrade.

PRODUCT SPECIFICATIONS

# FX10 (Metal)

The FX10 is built with a modular system architecture which allows users to unlock metal print mode with a simple swap of the print engine. With the additional purchase of a Metal Kit, the FX10 becomes the world's first industrial metal and composite printer. Reliably print composite and metal parts to drive superchare manufacturing and productivity on your factory floor. Metal enabled FX10 printers will need a Wash-1 and a Sinter-1 or Sinter-2 to wash and sinter green parts into production-ready metal parts.

<b>Metal Printer Properties</b>	<b>Process</b>	Metal Fused Filament Fabrication
	<b>Build Volume</b>	375 x 300 x 300 mm (14.8 x 11.8 x 11.8 in)
	<b>Weight</b>	122 kg (270 lbs)
	<b>Machine Footprint</b>	760 x 640 x 1200 mm (30 x 25 x 46 in)
	<b>Temperature Control</b>	Heated chamber reaches up to 60°C steady-state
	<b>Print System</b>	Swappable metal print engine includes metal print head, material routing block, and material tubing. Automatic material changeover
	<b>Power</b>	100-120 VAC 12A / 15A 200-240 VAC 6A / 8A
	<b>Safety</b>	UL 2011/CSA C22.2#301 certified, CE Marked, EU Machinery Directive compliant
<b>Materials</b>	<b>Metals</b>	17-4PH Stainless Steel, 316L Stainless Steel (coming soon)
<b>Part Properties</b>	<b>Layer Height</b>	127 µm post-sinter
	<b>Maximum Part Size</b>	292 x 132 x 131mm, (11.5 x 5.2 x 5.15 in), 10kg
<b>Software</b>	<b>Eiger™</b>	Secure digital library, powerful slicer, and printer management (premium options available at cost)
	<b>Security</b>	Two-factor authentication, org admin access, single sign-on, MFP print files encrypted by default and tamper resistant
	<b>Connectivity</b>	Eiger connection and over-the-air updates via wi-fi and Ethernet
